**BIF**

[www.bif.com.hk](http://www.bif.com.hk)

**Mobby** is a lively, mobile and unpretentious little fella', with a colourful personality. You can easily move it around for an impromptu breakout session, or store them away when you need the space for something else. Eye-catching mesh-like shells in popular colour options gives a smart look to suit all venues, from seminar rooms to cafeterias. Its versatile enough to suit educational, teaming and conference applications.

By folding up the seat, horizontal nesting to save up to approx. 60% storage space or 2.5 chairs in the space of one. It is also possible to stack a few Mobbys vertically and use its own castors as a trolley.

A surprising feature in this simple-looking chair is its equally simple synchronised recline motion. By eschewing complicated mechanism, springs or pivots, it promises a maintenance-free operation.

Writing tablet uses an anti-panic mechanism and is tested to 50kg loads. Its generous size accommodates an open A4 book or a 15" notebook computer. Recessions for a pen and cup, makes it perfect for those long caffeine-charged sessions.

The tablet height aligns with armrest, without uneven step-up, to provide a natural and comfortable writing surface.

Breathes like mesh, but much more durable than mesh. Dual-layer plastic perforated design creates a visual riddle and helps dissipate shock loads.

A groove in the armcap lets you hang bags and other belongings.

*Mobby swivel armchair, with gas lift for seat height adjustment.*  
Model 644 FD A64 N3

*Mobby, 4 legged castor armchair with ventilated moulded PP backrest and cushioned seat*  
Model 644 FD A64 H4
